

# 抗菌・抗ウイルス性アルミニウム陽極酸化用封孔剤

Antibacterial and antiviral sealing agent for anodized aluminum

# TOP NOBAC ALT

- 抗菌、抗ウイルス性に優れた酢酸ニッケル系封孔剤で、染色品にも使用可能  
Nickel-acetate based sealant with excellent antibacterial and antiviral effect, can be used for dyed aluminum
- グラム陰性菌、陽性菌を問わず高い抗菌効果  
High antibacterial effect on both gram-negative and positive bacteria

即効性が高く、短時間で菌の増殖を阻害  
Fast-acting and inhibit the growth of bacteria in a short time

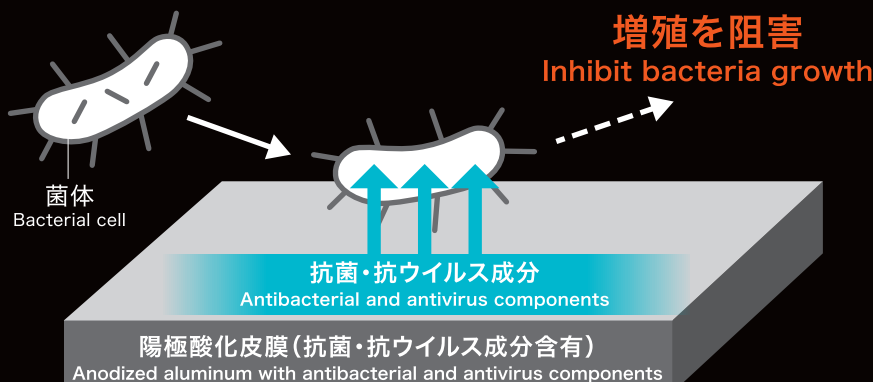

## 優れた抗ウイルス性 Excellent antiviral

A型インフルエンザウイルス <i>Influenza A virus</i>	ネコカリシウイルス <i>Feline calicivirus</i>
≥4.5	≥4.4

≥2.0で抗ウイルス性あり ≥2.0 means antiviral effectiveness

### 抗菌メカニズム Antibacterial mechanism

菌体が陽極酸化皮膜に接触することで効果を発揮  
When bacteria contact with the anodized aluminum,  
an antibacterial effect is caused

### 処理工程 Process
